

### **Emergency Information Form (EIF):**

Emergency medical care during the school day for students with complex medical conditions, particularly the medically fragile, can be challenging for emergency personnel due to the lack of summary of medical condition, precautions needed, and special management plans. Therefore, the Emergency Information Form (EIF) is completed for the students for whom pertinent medical information is critical whenever the student requires emergency care during the school day. This completed form and the signed authorization to release information are kept in the classroom in a locked file and presented to the emergency medical personnel upon arrival and transported to the medical facility.

The EIF was developed by the American Academy of Pediatrics and the American College of Emergency Physicians. The Hawaii American Academy of Pediatrics-PHNB-DOE Partnership Advisory (H-AAP-PHNB-DOE) endorsed the use of the EIF for medically fragile students and those with complex medical conditions at high risk for emergency situations during the school day.
